Crystal Clear

The Crystal Clear Skin System microdermabrasion technique performs a progressive treatment, that rejuvenates and lifts tired skin, to more in-depth treatments for lines, wrinkles, acne scarring, stretch marks and pigmentation problems - it does it all. Microdermabrasion is a safe, controlled way to exfoliate skin, reducing its thickness through mechanical abrasion of the dead skin cells with the use of crystals and a gentle vacuum action, which also gives an immediate lifting effect on tired muscles and stimulates the blood supply to the skin's surface. This helps promote new collagen and elastin formation.
